

Case Study No.3

THE ELEXIR OF LIFE

Precision machined parts. The difficult. The impossible. All of them.

THE ELEXIR OF LIFE

Case Study No.3

Water is life. It is the most common chemical compound on earth and the most important foodstuff. Without water a person can survive for only a few days and, depending on where you live in the world, a leaking water pipe can be life-threatening. This Dreher CNC machined part is part of a leak seeking device for drinking water pipes and we are really happy that in producing it we have been able to make the world just a little bit better.

Material and challenge

- Intricate overall contour created by complex cutting operation
- Corrosion-resistant source material (1.4571)
- High machinability and geometrical tolerance requirements
- Increased cleanliness requirements

If you are looking for someone to manufacture and construct difficult and impossible machined parts, talk to Dreher GmbH. Machined parts that other providers can't handle: hard-to-cut materials, extreme geometries.

Dreher GmbH operates state-of-the-art machinery made by reputable German manufacturers and operated by well-trained and motivated people.

Dreher CNC precision machined parts.
The difficult. The impossible. All of them.
