Case Study No.3

THE ELEXIR OF LIFE

Water is life. It is the most common chemical compound on earth and the most important foodstuff. Without water a person can survive for only a few days and, depending on where you live in the world, a leaking water pipe can be life-threatening. This Dreher CNC machined part is part of a leak seeking device for drinking water pipes and we are really happy that in producing it we have been able to make the world just a little bit better.

Material and challenge

- Intricate overall contour created by complex cutting operation
- Corrosion-resistant source material (1.4571)
- High machinability and geometrical tolerance requirements
- Increased cleanliness requirements

If you are looking for someone to manufacture and construct difficult and impossible machined parts, talk to Dreher GmbH. Machined parts that other providers can't handle: hard-to-cut materials, extreme geometries.

Dreher GmbH operates state-of-the-art machinery made by reputable German manufacturers and operated by well-trained and motivated people.
